PROFESSIONAL SUMMARY

Results-driven Full-Stack Developer specializing in the MERN stack with proven experience building end-to-end production-grade platforms including transportation management systems, matrimonial platforms, and intelligent recommendation engines. Adept at translating complex business requirements into scalable, high-performance web and mobile applications. Experienced in collaborating with teams of up to 15 engineers, integrating Spring Boot backends, and delivering consistent, high-quality output across both frontend and backend layers. Passionate about leveraging modern technology to build impactful real-world solutions and continuously exploring advanced concepts in system design, optimization, and performance engineering.

EXPERIENCE

Associate Software Engineer — Thynktech India, Pune

Sep 2025 – Present

- Developed and delivered product-based and client-centric full-stack applications using React, Node.js, and PostgreSQL, contributing to on-time project delivery for 3+ client engagements.
- Designed and implemented RESTful APIs and database schemas, reducing average API response time by ~30% through query optimization and efficient data modelling.
- Collaborated with cross-functional teams, ensuring code quality and consistent output through peer reviews and agile sprint planning.
- Integrated Spring Boot microservices with React frontends across 3 applications, improving inter-service communication and overall system reliability.

INTERNSHIP

Web Developer — Cognifyz Technologies, Remote

Mar 2025 – Jun 2025

- Built animated, visually impactful frontend interfaces using GSAP and React, improving user engagement metrics by ~25% through smoother transitions and richer UI interactions.
- Diagnosed and resolved critical rendering issues that had caused a ~40% drop in page performance scores, restoring Lighthouse scores to above 85.
- Collaborated directly with the core team to enhance UI/UX consistency across the product, reducing reported frontend bugs by approximately 35%.

PROJECTS

Matrimonial Web & Mobile Application | React • Node.js • PostgreSQL | View Project

- Developed a cross-platform matchmaking platform with secure authentication, profile creation, and smart search — reducing manual match-finding effort by ~60% for users.
- Implemented personalized profile recommendation logic that increased relevant match suggestions by ~45%, improving user retention on the platform.
- Designed a scalable PostgreSQL schema to handle concurrent user sessions and interactions, achieving stable performance under multi-user load testing.

Event Management Platform | React • Node.js • PostgreSQL | View Project

- Built a vendor discovery and booking platform that reduces event planning coordination time by ~50% by centralising vendor search, availability, and booking in one workflow.
- Integrated real-time availability and booking confirmation features, cutting double-booking incidents to near zero through conflict-detection logic.
- Designed a responsive React UI that decreased average booking completion time by ~35% compared to traditional email/call-based vendor coordination.

Hospital Management System | React • Node.js • PostgreSQL | View Project

- Built a unified admin panel for managing patient records, appointments, and staff schedules, reducing administrative overhead by ~40% through digitised workflows.
- Implemented role-based access control ensuring data security compliance, reducing unauthorised data access incidents by ~100% in testing.
- Optimised PostgreSQL queries for patient record retrieval, achieving ~50% faster load times compared to the initial unoptimised implementation.

Additional Projects: 3D Portfolio Website (Three.js • GSAP • React) • Authentication System (MERN) • Real-Time Logistics Management System (React • Node.js • PostgreSQL)

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript (ES6), React (4 production apps), React Native (3 production apps), GSAP, Three.js
Backend: Node.js (2 production apps), Java, Spring Boot (3 app integrations)

Databases: PostgreSQL, SQL

Tools & Version Control: Git / GitHub (collaborated with 15-member teams)

EDUCATION

B.E. in Computer Science — ISB&M College of Engineering, Affiliated to SPPU

Pune, Maharashtra

CERTIFICATIONS

- Artificial Intelligence — AcmeGrade (May 2025)
